

Module Elements Schedule

Part No	Description	Module Dimension	Graphic
S1-WM- [dim]	STARCO Wall Module Standard wall module, extendable from 6'-10" to 10'-3". Anodized Alum frame with white alum exterior surfaces and galvanized steel inner panels.	18 / 24 / 32 / 42" (S1-WM-24 = 24")	
S1-AIR- [dim]	STARCO Negative Air Wall Module Wall module extendable from 6'-10" to 10'-4", with dedicated exhaust louver and tube connections for digital pressure recorder. Includes 12" duct collar.	18" / 24" / 32"	
S1-FC	Flex Corner Module Flexible Corner module extendable from 6'-10" to 10'-4", and angles between 0-90 degrees. Airtight assembly.	3-1/4" (0-90°)	
S1-ICM	Inside Corner Module Rigid corner module extendable from 6'-10" to 10'-4". Two piece assembly.	3-3/8"	
S1-OT	T – Post Create a 'T' intersection of panels with this telescoping post. Specify Left or Right configuration	3-1/2"	
S1-HD- [dim]	Hinged Door, 42" / 54" - In / Out swing Pre-hung hinged door with or without closer and keyed Schlage lockset. 36" / 48" clear opening. Hinged left side only. Includes telescoping upper panel frame.	42" / 54"	
S1-SD-[dim]	Sliding Bypass Door, 42" / 54" Pre-hung bypass sliding door with ICU latch and keyed deadlatch. 38" / 50" clear opening. Slides to left.	42" / 54"	
S1-UDRP- [dim]	Upper extendable panel, 42" / 54" Roll shutter type extendable panel for use above doors. Simple installation to fit all doors.	42" / 54"	
S1-WI	Universal Wall Interface Gasketed assemblies for meeting a flat wall on Left or Right sides of wall panels. Set allows for 1-3/4" adjustment in width minus up to 1/2" compression.	3-1/2" nom	
S1-LWI	Left Wall Interface Gasketed assembly for mounting to Left side of wall panels to fit against a flat wall. Allows for 1/2" of compression.		
S1-FP	Filler Panel Kit Pair of extendable profiles to be joined to a field cut 5/8" thick drywall or plywood panel, creating an odd size panel or to allow a coping around obstructions.	A/R – 4" min	
S1-MC	STARCO Mobility Cart – 8 panel capacity Welded aluminum cart with 8" casters and plywood deck 33" wide	-	

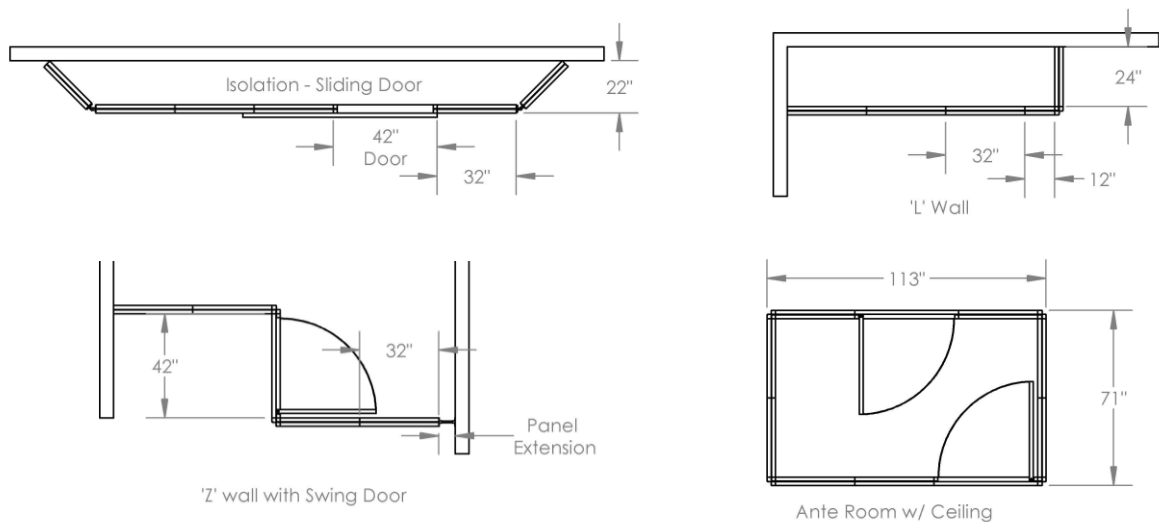

Part No	Description	Module Dimension	Graphic
S1-AC	STARC Accessory Cart – 6 panel capacity plus trays for corners and other accessories, tools, etc. Welded aluminum cart with 8" casters and plywood deck 33" wide	-	
S1-BFW-[dim]	Ceiling / Floor / Wall Bracket Universal bracket to anchor modules to ceiling grid, wall or floor. (-15 includes 15/16" flush grid clip; -9 for 9/16" flush grid)	-	
S1-GC	Recessed Grid Ceiling Bracket Brackets for securing metal track to ceiling to accommodate recessed grid tracks. (works with 15/16" and 9/16" recessed grid systems)	-	

Sample Layouts:

The STARC System allows complete flexibility when arranging the module elements to meet your containment needs. There are no limitations in configuring a temporary wall when considering the available standard module elements, including the filler panel components. Module elements are secured at the top with the supplied acoustic ceiling grid clips, while optional floor / wall brackets can be used to add additional restraint, allowing unlimited length wall sections.

Custom module dimensions (width / height, etc) are also available upon request to meet specific application requirements.

Below are some sample configurations to illustrate the possible arrangements. Contact us with your specific needs and we will configure a system for you.
